Welcome, To the Wonderful World of Gin...

Gin started life in the early 17th century in Holland, although claims have been made that it was produced prior to this in Italy.

WC Fields would start the day with two double martinis, enjoyed either side of his breakfast. He drank about two quarts of gin a day.

Every Gin brand has its own unique fragrance; most consumers have probably only tasted a small number of the gin brands available. In ours there are more than 60 different Gin brands, from 9 different countries; offering a wide spectrum of fragrances, using different botanicals and infusion methods in all shapes and sizes.

Gin is distilled differently. Premium Gins are distilled 3 to 5 times to remove impurities; each brand has a unique formula that provides its special characteristics.

The favourite drink of former President Gerald Ford is Gin and Tonic.

Gin is the only alcohol liquor that was first developed as a medicine remedy before it became popular as a social drink.

“Mother’s Ruin” a term that came from British soldiers taste for Gin when home on leave from the World War II, and the maternal state it induced in the women who shared their off-duty conviviality.

William of Orange prohibited the importing of alcohol to England in the early 18th Century encouraging the production and consumption of English Gin. The excessive consumption that followed gave rise to the name Gin Craze.

In Holland Gin was produced as a medicine and sold in chemist shops to treat stomach complaints, gout and gallstones.

The nose of this flavoured gin is dominated by complex fruity and floral aromas. The taste is very smooth with distinctive flavours of juniper berries in the foreground surrounded by spicy flavours of liquorice, caraway and fennel.

Spain: An elegant, seven-times distilled premium gin with fine, balanced flavours of citrus fruits and mint on the palate. Very fresh and lively with delicate juniper berry notes.

England: Reinterpretation of gin from the mid19th Century from the oldest gin producers in England. On the palate, with distinct notes of juniper berries, coriander, with mild sweetness and floral tones. Very soft and gentle mouth feel.

Made in small batches, each bottle is individually numbered; the 60% volume reflects the Shetland's 60 degree North location. Bracing, crisp and richly aromatic, Blackwood's Nordic Dry Gin's unique flavour comes from its ingredients which include wild water mint, sea pink and meadowsweet flowers, coriander, and angelica root strain all picked on Shetland by local crofters as well as seven other botanicals including turmeric, citrus peel and orris root.

1724

We're not going to bore you with the usual tonic water history class, we just want to go back to its true origins. So we won't tell you about the Spanish conquistadors who discovered quinine in the Americas and used it to save the life of a dying countess in the eighteenth century, nor will we recount tales of the ancient Inca civilisation that had used quinine over 100 years earlier, or even that the trees from which the quinine was extracted were to be found on the legendary Inca Trail.

All you need to know is that for this tonic they collect the quinine by hand at 1,724 metres above sea level, there where the story began, on the inca trail that stretches from Argentina almost all the way to Mexico.

Ice Cubes

From Blenheim Palace Natural Mineral Water, the spring is located just 1 mile from The Feathers.

Tonic Water List (Not for medicinal purposes only!)

ADLER BERLIN DRY (DEU)	42%	£8.50
All the essences for the Berlin Adler are extracted by hand, and distilled in a vacuum sealed pot still, originally built in 1924. The gin is then stored in earthenware vessels before being specially created under quality designation 'Berlin Dry Gin' in apothecary bottles filled and sealed by hand. The end product is unusually mild, with the citrus pronounced and long lingering.		
ADNAMS FIRST RATE (GBR)	48%	£10.50
Adnams from grain to glass, their Copper House gin is distilled from three locally-grown grains: barley, wheat and oats. Adnams Masterbrewer, Fergus Fitzgerald, makes a beer 'wash' from these grains which is fermented to around 6% abv without the addition of hops. Their head distiller, John McCarthy, then takes this beer and puts it through a 'beer stripping' column which removes all the alcohols to create a 'low wine' (around 80 - 85% abv). The 'low wines' are subsequently distilled in our hand-made copper pot still and purified further in rectification columns to create a clean, pure spirit. Only the very purest portion of the spirit is drawn off; the finest cut. The spirit is then returned to the copper pot still to be redistilled and infused with thirteen carefully chosen botanicals. John spent several months experimenting with different blends to create the signature First Rate flavour with integrated aromas of juniper berries, spice and fresh citrus.

£5.50

An extraordinary gin, by Professor Cornelius. This gin is made in small batches of 32 to 60 bottles. The result is an extraordinary gin, light tinted by the botanicals with a flavour which is bold and unique.

BATHTUB NAVY-STRENGTH GIN (GBR)

57%

£6.50

This is the Navy strength edition of the famous Bathtub Gin. As well as boasting a higher ABV than the original, this edition has a bigger botanical punch thanks to the 'bashing up' (technical term) of the botanical to release more flavour.

The story goes that the term Navy-Strength was the result of the British Navy demanding gin to be bottled at 57% ABV so that if it was accidentally splashed on gunpowder, the powder would still ignite. It was more likely that it was a weight-saving measure but that is not as fun is it?

BATHTUB OLD TOM GIN (GBR)

42.4%

£6.50

Professor Cornelius Ampleforth has been at it again, and this time he's recreated a traditional style of gin that was very popular in 18th and 19th century England. Old Tom is a slightly sweeter gin, created by the professor following a request from The Handmade Cocktail Company, which needed a tasty Old Tom gin for us in their Martinez Cocktail.

Old Tom got its name from an unusual dispensing method used by London gin houses. A tom cat-shaped plaque would be hung outside where passers-by could drop a coin in the animal's mouth. The proprietor would then dispense a shot of gin from a tube under the cat's paws.

This almost-forgotten style of gin is perfect in sweet gin cocktails – its how the classic Tom Collins got its name – and it makes a tasty G&T.

The previous chairman, Lord Daresbury, was a direct descendent of Edward Greenall. The family motto "Alto Peto" translates as "I Strive Higher". This once cottage based industry is now the second largest gin distillery in Britain, producing over 50% of the UK's Gin and almost 15% of the world's Gin. In 2011 the business was bought by Quintessential Brands.

CHIEF GOWANUS NEW-NETHERLANDS GIN (USA)

44%

£7.50

A Dutch gin by the way of America. With a recipe discovered by drinks historian Dr. David Wondrich in the early 19th Century book 'The Practical Distiller', the New York Distilling Company is making what was once old, new again.

The Chief Gowanus is made with a base of un-aged, double distilled rye whiskey, which the New York Distilling Company just happened to have lying around, as if they were in the process of making their own aged rye. With a good helping of juniper berries and cluster hops, the kind which would have been used around the early 1800's, it goes through a third distillation in a traditional pot still and is then aged for three months, creating a smooth, robust enever for the new generation.

As with their previous release, the New York Distilling Company have named the gin after a great New Yorker, this one being Chief Gowanus, the Native American chief of the Canarsees who was around when Brooklyn was still Dutch.

CROSSBILL SMALL BATCH HIGHLAND DRY GIN (GBR)**43.8%****£8.50**

Crossbill Highland Dry Gin features a very simple botanical selection – 100% Scottish juniper berries and rosehip. That's it. In a time where some gins are made with a plethora of botanicals, it's nice to see some distillers keeping it going the opposite route and making a tasty gin with a fewer botanicals. As you can probably guess, Crossbill is juniper forward, with bundles of fresh pine notes, kept in check by the sweeter, slightly fruity rosehip touches.

Crossbill is named after the Scottish Crossbill, a small bird which has an unusually shaped beak to help it get at the seeds of conifer cones.

Named after the infamous Beefeaters of the Tower of London, who guard the Tower and its precious contents for over 100 years. Crown Jewel is a rare treat within Gin, an improvement on an already great Gin. Triple-Distilled and with a secret mix of botanicals, which apparently would be treason if ever divulged.

UNGAVA (CANADA)

43.1%

£8.00

Ungava Dry gin is made in Quebec, Canada. It presents as a pale yellow colour. They are proud to infuse their gin with six herbs indigenous to the territory and handpicked during the "fleeting" summer months. These include wild rose hips, arctic blend (a type of tea also known as north Labrador tea), cloudberry, Labrador tea, crowberry, and Nordic juniper. They describe the taste as "floral and spicy." Because of these non-traditional, floral ingredients we have opted to list this as a modern-style gin as opposed to a more juniper forward traditional gin. They suggest serving on ice with a garnish of grapefruit.

ZUIDAM DRY (NLD)**44.5%****£8.50**

Zuidam Dry Gin contains nine botanicals: Juniper berries and iris root from Italy, coriander from Morocco, angelica root, fresh sweet oranges and lemons from Spain, real whole bean vanilla from Madagascar, licorice root from India, cardamom pods from Ceylon. Unlike other gins, which add all the botanicals simultaneously, Zuidam distills each ingredient or botanical separately and then marries the nine different distillates together according to their secret recipe. Zuidam Gin is steeped in the tradition of family distilling in Holland and produces this world class, exceptionally high quality, small batch gin. Small batch production and individual ingredient distillation enhance the flavour and aromas. The gin is then aged 3 months before bottling. The nose is clean with fresh citrus and earthy juniper notes and a beguiling hint of spice and vanilla. Its layered flavours make it a perfect martini gin, yet the balance of flavours allows it to mix admirably with the fresh fruit flavours favoured by today's cutting edge bar chefs.

Sloe Gins

Sloe Gin was a popular drink from the 19th century onwards. Traditionally sipped as a digestif and as a winter warmer at outside sporting events, today it is still enjoyed on its own, over ice or as a long drink. It was also an important ingredient in the first cocktail era of the late 19th and early 20th century. And thanks to the Sloes being so bitter for most birds, that leaves more for us...

FOXDETON SLOE (GBR)

29%

£9.00

Foxdenton are often asked; "What makes your Sloe Gin recognisably different?" So what is difference? To the eye. This Sloe gin is paler than others. Foxdenton don't add any colourants so the paleness is a result of the way they treat their Sloes and that it's all natural. On the nose, this Sloe Gin is quite "ginny." Foxdenton Sloe Gin is appreciably drier. They use less sugar so the end result is less like a liqueur but is still very easy to drink.

Foxdenton make their Sloe Gin at 29% ABV. stronger than nearly all other Sloe gins, this does give rise to a higher costs but they think it gives this Sloe Gin real bite. So although Foxdenton only use Sloes Sugar and Gin as do the other makers they really do make a Recognisably Different Sloe Gin.

BYRRH (FRA)

18%

£ 6.00

Byrrh is a blend of red wine and quinine or tonic water. Byrrh was created in 1886. It was popular as a French apéritif. With its marketing and reputation as a "hygienic drink," Byrrh sold well in the early twentieth century. It was even exported, despite a name complicating sales as the word "byrrh" evokes ideas of similarities to "beer" for English- and German-language speakers.

Brothers Pallade and Violet Simon, itinerant drapers, decided to take advantage of the wine fever in the region to develop an aperitif wine flavored with cinchona. They mixed dry wines and mistelles. The resulting product was initially marketed as a health drink or tonic. This was because the local aperitif producers were not happy at competition to their established brands. The brothers re-branded the drink as a health drink to get round this problem, and it was sold in pharmacies.

Pernod Ricard still makes the drink at its Perpignan facility, which was designed by Gustav Eiffel.

NOILLY PRAT (FRA)

15%

£5.00

Noilly Prat (pronounced Nwa-ee Prat), known as 'the Rolls Royce of vermouths', is recognised by barmen all over the world as a premium cocktail ingredient. The characteristic taste of Noilly Prat is attributable to the blend of white wines, fruit essences, herbs and spices. When combined with oak ageing, the result is a truly excellent dry vermouth.

In 1813, Joseph Noilly created the first recipe for dry French vermouth. To this day, the process has remained unchanged. Still produced in the South of France, the white wines are matured for eight months in large oak casks. Then, in a unique open air process, they are transferred to smaller oak barrels, where for 12 months they are subjected to the elements and take on a deep amber colour. The white wines are then brought back indoors for blending. The fruit essences, including raspberry and lemon, are incorporated, before twenty different herbs and spices are added. These botanicals gradually impart their flavour to the wine to create the delicate flavour of Noilly Prat Dry.

NOILLY PRAT AMBRE (FRA)

18%

£5.00

Noilly Prat Ambre is a relative newcomer to the Noilly Prat family.

The deep amber colour of Noilly Prat Ambre and its rich, full-flavour are due in part to the addition of orange, cinnamon and vanilla to the secret, aromatic blend of herbs and spices infused into the fine French wines.

PIMMS No1 Cup (GBR)

25%

£4.20

The recipe was invented by the owner of a City of London oyster bar in the early nineteenth century. Originally there were other variations: No2 (whisky), No3 (brandy), No5 (bourbon) and No6 (vodka). Not strictly a liqueur, Pimms is a gin-based drink, infused with aromatics and mixed with lemonade for consumption. Pimms has powerful social associations with the English, or London, 'season', and the sort of people who take part in events such as Henley, Ascot, May Balls and wherever else the young (and not so young) in-crowds gather.

Connoisseurs insist that only adding champagne as opposed to lemonade, makes a true Pimms No1 Cup
